Our U.S. subsidiary in Newnan, GA, is currently seeking an intern in planning starting in January 2011. This internship will be for a minimum of four months.

Intern (m/f) in planning

You will support the planning team in the following areas of responsibilities:

- administrative support related to projects
- working with our Excel Planning system
- support in updating the planning schedule, rework/warranty schedule, installation schedule and documentation schedule
- transferring positions from the planning schedule to our Database
- gain insight into capacity planning

You have started your studies in industrial engineering, process engineering or business studies and you have completed previous semesters successfully. At best you have already gained first experiences in similar internships. Furthermore you are skilled to use the MS office applications. In addition you are highly motivated and able to work independent as well as in a team.

We offer the possibility to deal with interesting issues in a motivated and international team. You will work on a variety of tasks and gain practical experiences.
